info@businesssherpagroup.com

We take care of the full bookkeeping function.

We mean it. We take all the bookkeeping off your plate, everything from entering bills and receipts to AP/AR to payroll and HST filings.

There is nothing you will have to handle anymore as our team of certified cloud-based accounting experts truly becomes part of your business. We like to call this an 'embedded' approach (different than an 'agency' approach). Working in an embedded way means we understand the unique environment of your business and care about helping your business to thrive.

Team

- Certified cloud-based accounting experts
- An entire team to ensure continuity
- Diverse experience
- Collaboration: we leverage the team's knowledge to give your business the best support possible

Price

- Tailored to your unique business needs
- A fixed fee every month = predictability & stability
- No Subscription and not locked in
- Quarterly reviews ensure your current needs are met

Real-time Data

- Cloud-based means everything is backed up and accessible from anywhere
- Real-time data means better decision making & better insights

Value Based Pricing: Changing the landscape

Value Based Pricing (VBP) is replacing tradition accounting pricing. VBP means there is a fixed monthly fee based off your unique business. This enables stability and allows SMEs to accurately budget their accounting costs.

Adaptability is one of our values, and we made sure to build this into our VBP model - it ebs and flows right alongside your business.

Technology Audit

We leverage technology to automate and improve workflows and processes. Our tech-savvy team has a robust technology stack at the ready. An intial technology audit at the onset ensures your business is set up for accounting success.

Continuous Accounting

Real time data & ongoing updates are the ultimate goal. We call this 'continuous accounting'. It blends professional judgement with leveraging automation to gain a competitive advantage.
